1. Comment. Index figures 15, 28 and 39 are assigned to reparations and export shipments to the USSR. From index figure 69 and the number of 16 cars mentioned, it is inferred that these shipments consisted of uranium ore to Brest Litovsk. the shipment concerned consisted of military goods

the shipment consisted of ammunition, probably empty shells, sent to the USSR. This assumption is supported by the fact that the shipment was dispatched from Torzau where an ammunition depot of the GDR is located.

2. Comment. Previously, Polish hard coal shipments arrived via the Kuestrin Kietz border station at a rate of 300 to 400 carloads per day. Polish hard coal is also directed via the Guben, Forst and Horke border stations.
